

# INSTRUCTIONS

## Materials:

- = Printed Zee Zees mask file
- = Popsicle sticks
- = White glue
- = Scissors

1. First, download the Zee Zees Halloween masks file from the Zeesources tab.
2. Print the file on a home printer at full scale.
3. Carefully cut along the dotted lines around the Zee Zees head (You can cut right up to the black lines to avoid a white border around your mask).
4. Cut along the dotted line inside the eyes of the mask to make sure that you can see! (It helps to carefully poke a small hole through the center of the white circle and then cut around from the inside).
5. Use the white glue to adhere the popsicle stick to the back of the mask.
6. Hold the mask in front of your face and do your very best Zee Zees impression!
